While the AG's review of the sale of Mission to HCA continues, SEARCH decided to document the services currently available at each of Mission's Affiliate hospitals.

The alphabetized list of services at left comes from the <https://missionhealth.org/> website and its links to Affiliate hospitals as of early January 2019.

According to Becky Carter at a meeting on 1/7/2019, this data is not being updated at this time due to the pending sale.

She also mentioned that the AG's office had requested that Mission and its affiliate hospitals download their own lists of services from the website, update it, and provide to the AG's office, which they have done.
